Development engineer specialized in React-Native and Nextjs, I can meet your needs precisely and efficiently, using modern, secure technologies.

Work experience

From February 2023 to June 2023	**Mobile and Web development** Watt Analytics Vienna, Austria (remote). Remote contract following my on-site internship.
From October 2022 to February 2023	**Internship - Mobile and Web development** Watt Analytics Vienna, Austria. Graduation internship, with the main task of redesigning the Watt Analytics mobile and web applications into a single React-Native-Web application. In this Austrian start-up, I experimented with the SCRUM framework and took part in other missions: DB management, presentation of technologies to the dev team, customer contact, hardware testing...
From June 2021 to July 2021	**Internship - Next.js Developement** LBKE - Montpellier, France (remote). Development of the Vulcan open-source framework: adding features, testing, auditing, database connection, etc.
Since July 2017	**Lots of Barman and Waiter jobs** Bars, campsites and hotels France.
From 2012 to 2013	**Young Firefighters** Caserne - Valras-Plage, France.

Education

From 2019 to 2022	**Engineering School - Computer Science and Management** Polytech Montpellier, France.
From 2021 to 2022	**Erasmus in Cybersecurity** Universitatea Politehnica din Bucuresti; Bucharest, Romania.
From 2017 to 2019	**Preparatory school in mathematics and IT** Lycée François Arago Perpignan, France.
From 2014 to 2017	**Scientific Baccalaureate, with high honours** Lycée Marc Bloch Sérignan, France.

Skills

Javascript	Next, React-Native, Redux, Nest, ...
Other languages	Python, Java, Swift, Kotlin, PHP
Agile methods	Scrum, continuous integration, test-driven development
Database design and management (SQL and noSQL)
